

Electronically identifiable

The RFID marking enables you to automatically identify and locate AUER containers. The barcode information (numeric code 128) is printed on a stable, white polyester material and it is firmly embedded through the use of a high-quality resin film.

- Production process: thermo-transfer, rounded corners
- Basic material: Polyester film
- Label size: 103x20 mm
- EPC memory: 96 bits

DETAILS

Outer dimensions L x W	10.3 x 2 cm	Adhesive	HL2
Production process	Thermo-transfer, rounded corners	UHF inlay	890-960 MHz
Label size	10.3 x 2 cm	EPC class	1 gen 2 compliant
Barcode	Code 128 numeric	Chip type	Monza 4D chip
Basic material	Polyester film	EPC memory	96 bits
